

Carbon Monoxide Detector

New law effective Jan. 1st 2007

Illinois has a new law requiring CO detectors to be installed in ALL homes.

Carbon Monoxide (CO) poisoning is a serious threat to many households.

However, you can protect your household with the Nighthawk CO detector offered by Nicor Services.

The Nighthawk detector is one of the industry's top rated CO detector.

According to the U.S. Consumer Product Safety Commission, CO detectors are as important as smoke detectors.

What is Carbon Monoxide?

Carbon monoxide (CO) is an odorless, colorless and tasteless gas. It is produced when any fuel is burned without sufficient oxygen. Overexposure to CO can cause CO poisoning, this can lead to serious illness-even death.

How does it happen?

Harmful CO can occur if there is poor ventilation of fuel-burning appliances such as gas furnaces, ovens and portable heaters. Fumes from auto exhaust, generator sets and improperly vented fireplaces, grills, and wood stoves can also be sources. The chance of CO poisoning during the winter months can be greater since most homes have the windows closed.

Effective January 1st 2007, Illinois has a new law requiring all residential, Multi-residential and mixed occupancy buildings to have a functioning CO detector within 15 feet of each sleeping area

Most CO Detectors have a life expectancy of 3-5 years and should be replaced to continue to give protection. Make sure you don't have an older unit at home.

AC Plug-in with Rechargeable Battery Backup Carbon Monoxide Alarm

\$69.95 + tax & shipping handling

Features

- Exclusive 3 mounting options in one unit! – Direct Plug, Wall Mount, and Table Top. Accessories provided for wall mount, direct plug and table top application with 6' power cord
- **Includes Rechargeable Lithium Ion Battery Backup** – Provides protection during power outage
- Digital Display – Displays the level of carbon monoxide the unit is sensing. The unit updates this reading every 15 seconds.
- Test/Reset Button— Tests the unit for proper operation – Resets the Carbon Monoxide alarm.
- Peak Level Button – Displays the peak CO level recorded by the alarm since it was last reset or unplugged.
- **Loud 85 dB alarm warns of high CO levels**
- Sensor – The sensor is highly sensitive – electrochemical sensor that is CO specific to help avoid false alarms
- LED Operation – – Blinking dot in lower right corner of display denotes normal operation – Digital readout displays CO concentration in parts per million (30-900PPM). In alarm condition you will hear 4 quick beeps.
- **7- year limited warranty**
